**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7, 15, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kumada et al (EP 04-138856 in view of its English language abstract).

Kumada et al disclose a positive or negative photosensitive resin comprising monomers meeting the instant claim limitations for claims 1-7, 15, 19, and 20. The radiation employed may be ebeam. Given the teachings of the reference the instant claims are anticipated by Kumada et al.

***Allowable Subject Matter***

3. Claims 8-14 and 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare a positive radiation sensitive composition comprising a compound meeting the conditions a3.
